

M01 pickup-and-return

PROVISIONAL MOTION / LAYER CONTRACT • PENDING HUMAN REVIEW

M01 Pickup / return / settle

Short deterministic study • 360 ms travel + 140 ms settle

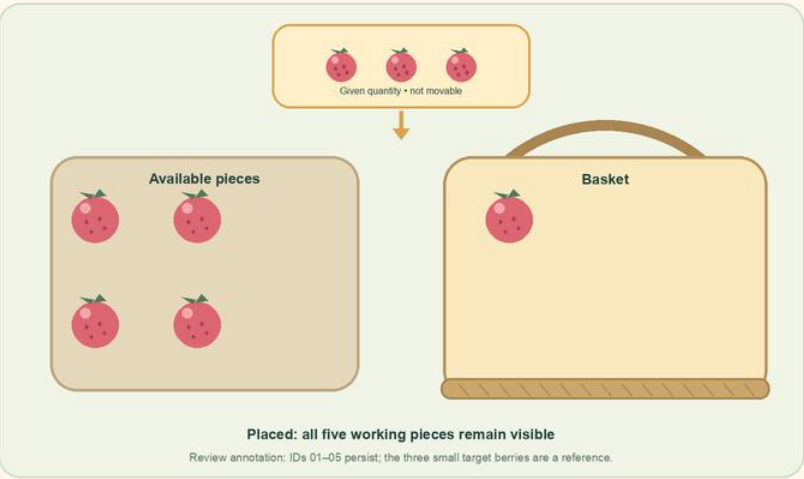

PHASE 1 • PENDING HUMAN REVIEW • OFF-APP SCHEMATIC

No selected illustration pack. No native animation implementation. Silent study.

1. Before pickup

Start CNT-01: target model 3; five unique berries in original tray slots; basket empty.

Middle One accepted move commits piece-03 to basket slot-01; presentation travels and settles. Four other identities stay fixed.

End Return/Undo restores the same piece-03 to original tray slot-03. Target stays 3; basket empty; all five pieces visible. This sample does not submit or complete the activity.

Reduced Motion Immediate single-instance reposition at accepted input; fixed scale 1.0. Optional static selected outline for at most 120 ms, no travel/bounce.

Ownership An accepted tap/drag/Undo changes persistent region/slot/history or reward ownership exactly once before presentation. Invalid/cancelled input commits nothing. Animation completion only clears ephemeral transforms.

Pending Human art/content/comfort/child-use decisions remain pending. Final layers/pivots and native behavior are unproduced.
