1. Explicit response ready

Start No automatic success on initial render, including target zero. A valid explicit Done/number response is required.

Middle Correctness/checkpoint completion already persisted once; show restrained pleased pose and mark. Mathematical evidence remains unchanged by celebration.

End Completed arrangement remains stable. Continue is immediate. One session reward grant is owned/idempotently committed by the session model, never by animation end.

Reduced Motion Immediate pleased pose/check and live Continue. No spark travel or glow pulse; completion visible without effects/speech.

Ownership An accepted tap/drag/Undo changes persistent region/slot/history or reward ownership exactly once before presentation. Invalid/cancelled input commits nothing. Animation completion only clears ephemeral transforms.

Pending Human art/content/comfort/child-use decisions remain pending. Final layers/pivots and native behavior are unproduced.
