1. Aligned ready

Start Stable aligned ready pose, current scene/navigation state already established.

Middle One friendly pose transition; greeting/farewell language optional. Controls can navigate immediately.

End Return to ready or immediate requested exit. Resume is silent. Farewell neither writes progress nor deletes state; persistence belongs to native model.

Reduced Motion Immediate calm greeting/farewell pose; fixed anchor and no crossfade needed. Navigation never waits.

Ownership An accepted tap/drag/Undo changes persistent region/slot/history or reward ownership exactly once before presentation. Invalid/cancelled input commits nothing. Animation completion only clears ephemeral transforms.

Pending Human art/content/comfort/child-use decisions remain pending. Final layers/pivots and native behavior are unproduced.
